# NO HITS

**There were no hits from the Death Master file for SSN # 042-68-4425**

If SSN # 042-68-4425 had ever belonged to anyone who had ever died owning this number this database would have pulled that information for me.

# NO HITS

There were absolutely no returns of any information of any kind as it pertains to **SSN # 042-68-4425**. As per my database pulls, it does not exist.

I did not do any pulls on Michelle Obama, obviously because she is not the President of The United States. Besides she is “small potatoes” when it comes to all of this. She is just an enabler.

Today, I re-entered the information for a third time because I wanted to triple-check my findings.

Below is a list of the databases that I have access to. Every single person in the United States, rich or poor, famous or obscure, and those who have ever done anything that used or needed their personal identity or their personal information, or filled-out any paperwork of any kind that information is on these databases.

I used all pertinent searches that I could when it came to the Obama's even at the risk of my being cut-off from ever being able to use these databases ever again. As GOD is my witness I have risked this potential retaliation because it was / is worth it to me to get to the truth about these people.
